ABOUT ME

I am a Full Stack Developer specializing in MERN . I build modern, responsive, and scalable web applications with a focus on both frontend and backend. Skilled in React.js, Next.js, Node.js, Firebase, and database management, I integrate REST APIs, authentication systems, and dynamic features to deliver fully functional, user-friendly websites. I enjoy turning client requirements and Figma designs into responsive, production-ready solutions while collaborating effectively on real-world projects.

WORK EXPERIENCE

Linkdin | September 2025 – Present

Full-Stack Developer

Worked as a freelance Full-Stack Developer using the MERN Stack, handling both frontend and backend development and delivering complete web applications based on client requirements.

Verior | March 2025 – Oct 2025

Full-Stack Developer

Worked on live full-stack projects using Node.js, React.js, and Next.js, developing backend APIs, integrating REST and FastAPI services, converting Figma designs into Next.js applications, using Firebase where required, and collaborating directly with clients to deliver complete solutions.

Digital Elliptical | Oct 2024 – Jan 2025

React Developer (Intern)

Worked on real-world React.js and Next.js projects, integrating APIs and collaborating with the team on client websites.

Digital Elliptical | July 2024 – Aug 2024

Frontend Developer (Intern)

Worked remotely on frontend tasks using HTML, CSS, and JavaScript, focusing on responsive and user-friendly interfaces.
